About me

I'm a third-year Computer Engineering student at the University of Girona, passionate about technology and design. I enjoy developing web applications and working on projects that combine creativity and logic, especially in front-end development and user interface design. I consider myself a proactive and responsible person who learns quickly and enjoys teamwork. My goal is to keep improving my programming and design skills to create efficient, user-friendly, and visually appealing digital solutions.

Experience

Summer Assistant — Family Plumbing Business (Santa Coloma de Farners)

During the summers, I worked in my family's plumbing company, collaborating with professionals of different ages and backgrounds. This experience helped me develop teamwork and communication skills while learning about plumbing, construction, and installation tasks on various building sites. It also taught me the importance of responsibility and adaptability in real working environments.

Pizza Delivery Driver — [Pizzeria d'akialla]

Working as a pizza delivery driver has allowed me to develop strong time management and customer service skills. I have learned to navigate efficiently through the city, ensuring timely deliveries while maintaining a friendly and professional demeanor with customers. This job has also taught me the importance of reliability and communication in a fast-paced environment.

Basketball Coach — Club basquet Farners (Santa Coloma de Farners)

As a basketball coach, I have been responsible for training and mentoring young athletes, helping them develop their skills and understanding of the game. This role has enhanced my leadership and communication abilities, as I work closely with both players and their families to foster a positive and supportive environment. I have also gained experience in organizing practices and coordinating team activities, ensuring that all participants are engaged and motivated.

Education

- Compulsory Secondary Education (ESO) — Institut de Santa Coloma de Farners (Spain), 2017–2021
- High School Diploma (Technological Baccalaureate) — Institut de Santa Coloma de Farners (2021 – 2023)
- Bachelor's Degree in Computer Engineering — University of Girona (2023 – Present)

Projects

GraphStream Route Simulation

This project involved creating a simulation of vehicle routes using the GraphStream library. The goal was to visualize and analyze traffic patterns in urban environments. I was responsible for implementing the core simulation logic and integrating it with a user-friendly interface.
